Tombstone Ghoul

LED & Hardware setup

Total LEDs: 250

Recommended power supply for brightest white:
5V 8A supply connected to LEDs
 (for most effects, ~3A is enough)

Enable automatic brightness limiter: ☒

Maximum Current: 850 mA

Automatically limits brightness to stay close to the limit.
 Keep at <1A if powering LEDs directly from the ESP 5V pin!
 If you are using an external power supply, enter its rating.
 (Current estimated usage: 861mA)

LED voltage (Max. current for a single LED):
 12V (30mA)

Keep at default if you are unsure about your type of LEDs.

Hardware setup

LED outputs:

1: WS281x
 Color Order: RGB
 Start: 0 Length: 250
 GPIO: 2
 Reversed (rotated 180°): ☐
 Skip first LEDs: 0
 Off Refresh: ☐
